

Fax driver installation fail.

Microsoft introduced a change via a Windows patch as detailed under KB 3072640 which can result in some Windows applications failing to install. Zultys Fax Driver is impacted by this change.

Please refer to this link for details of the change Microsoft made - <https://support.microsoft.com/en-us/kb/3072630>

Per the Microsoft information you may perform the following steps to allow the Fax Driver to install.

To temporarily undo the security fix in KB 3072630, follow these steps:

1. Click **Start**, click **Run**, type regedit in the **Open** box, and then click **OK**.
2. Locate and then click the following subkey in the registry:

HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Microsoft\Windows\Installer

Note If this subkey does not exist, create it.

3. On the **Edit** menu, point to **New**, and then click **DWORD Value**.
4. For the **DWORD** name, type RemappedElevatedProxiesPolicy, and then press Enter.
5. Right-click **RemappedElevatedProxiesPolicy**, and then click **Modify**.
6. In the **Value data** box, type 1, and then click **OK**.
7. Install the required application.
8. After the application installs successfully, reset the **RemappedElevatedProxiesPolicy** **DWORD** value to **0** to re-enable the security fix for KB 3072630.
