

MySQL Report issue on Windows and Zultys ver11

If you are trying to run Reports and get this error :

This is a Windows fault caused by Windows updates.

Solve by doing this :

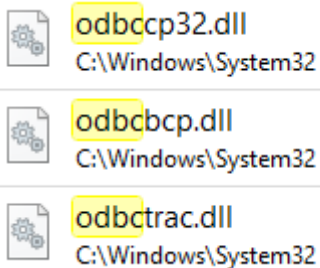

Window 10 go to Settings > System>Apps and Features

Uninstall MySQL Connector/ODBC 3.51

Regedit search for MySQL and delete and ODBC entry under system 32 and sysWOW64.

Check directory c:\windows\system32 and c:\windows\sysWOW64 for odb

If the following is found Remove

THEN : Access MXAdmin, **Select reports and re install MySQL**

Upgrading your MX to V11?

NB. Prior to upgrading a system to v11, if MX Administrator reports have previously been utilized, the following procedure must be followed:

- 1) Uninstall MyODBC using the MyODBC install package under C:\Program Files (x86)\Zultys\MXAdmin\drivers
- 2) Upgrade the system to Release 11.0.2 Make sure to install MX Administrator version 11.0.2
- 3) Manually install the ODBC 3.51 driver under C:\Program Files(x86)\Zultys\MXAdmin\drivers\mysql-connector-odbc-3.51.30-win32
